

Product datasheet

Curi-Med Orthopaedic underpadding, Natural
220374 – 7,5 cm x 3 m
220375 – 10 cm x 3 m

Description:

Natural Orthopaedic underpadding made from 100% Viscose, 90 g/m².
Rolls individually wrapped in protective paper.

Material length unstretched: 3000 mm ± 100

Average weight per roll 7,5 cm (220370) : 21,45 grams ± 1,9

Average weight per roll 10 cm (220371) : 28,6 grams ± 2,6

Average weight of bag with 5 rolls 7,5 cm 105-124 grams

Average weight of bag with 5 rolls 10 cm 137-163 grams

Produced for Abena A/S, DK according to ISO 9001:2008. Products classified as class Is or above are also produced according to ISO 13485:2012.

Application:

Curi-Med synthetic underpadding is comfortable to wear, and provides a cushioning and protective layer under Plaster of Paris and compression bandages. Curi-Med underpadding evens out contours and hinder excessive pressure on protrusions.

CE

CE-label according to EU Directive for Medical equipment 93/42/EEC, class 1

Packaging and labeling:

5 rolls in neutral PE bag

14 bags per carton

Labeled with production date, LOT number and expiry date.

Storage, durability and waste management:

3 years. Store in dry environment, away from sun exposure.

Item no.	Product	Size	Quality	Quantity per pack./carton
